

The PRO 500

For convenient daily use:
the PRO 500 refraction unit features a practical, modern, and ergonomic design. It offers a wide range of functionalities and fulfils all requirements for connecting RODENSTOCK Instruments equipment.

☆ Attractive combination

This refraction unit is designed for the demands and expectations of customers who want to maintain a balance between space and connectivity without missing out on an attractive design.

☆ Talented beauty

The PRO 500 is an elegant basic model that's fast and easy to install. The column comes with a fashionable overhead light. Choose the phoropter arm that best suits your needs.
